

GRZ Technologies Ltd. is a start-up company active in the field of energy technology. Backed by several industrial partners, we develop hydrogen storage and compression systems. Our workplace in Grolley (Switzerland) is easily accessible by public transport and located in an attractive environment.

We offer a pleasant working environment in a small, dynamic, innovative, and international team. We cultivate an entrepreneurial spirit and are oriented towards the development of our collaborators in order to achieve our ambitious goals.

Since the company is in a high-growth phase of its development, many opportunities for professional growth exist. In order to expand our team, we are looking for a

Senior Integration Engineer

Your primary activities in the company will be:

- Coordination of and participation in the development of industrial systems and prototypes in the field of hydrogen and gas technology, with a focus on system integration
- Design of hydrogen systems in collaboration with our product development team
- Contact with suppliers
- Compilation of technical documentation

You should have a rounded profile and ideally:

- You have completed training as an engineer in a relevant field at a renowned institution; ideally you have also completed professional education in a relevant field previously
- You have worked as a development project manager in technically challenging projects
- You have experience in quality control processes and compliance with various technical codes and regulations
- You have international experience and are fluent in English
- You are passionate about new technology and the energy sector, you are able to work in a goal-oriented and pragmatic way, and are looking for an opportunity to grow professionally; in addition, you should be able to work independently and reach or outperform objectives

In case of interest, please send your application documents in electronic form to hr@grz-technologies.com. We are looking forward to hearing from you.
