

**GRZ Technologies Ltd.** is a start-up company active in the field of energy technology. Backed by several industrial partners, we develop hydrogen storage and compression systems. Our site and the workplace are in Grolley (Switzerland) and are easily accessible by public transport.

We offer a pleasant working environment in a dynamic, innovative, and international team. We cultivate an entrepreneurial spirit and are oriented towards the development of our collaborators to achieve our ambitious goals.

Since the company is in a high-growth phase of its development, many opportunities for professional growth exist. To expand our team, we are looking for an

## Electrical Engineer

Your primary activities in the company will be:

- The execution and coordination of electrical engineering work within contract projects and product development. This includes:
  - Creation and review of technical documents, for example, specifications for inquiries and internal processes
  - Contact with external partners (both related to documentation and hardware)
  - Organization of internal and external meetings
  - Execution of acceptance tests
  - Engineering and creation of documentation related to ATEX requirements
  - Support of the manufacturing team during peak times
- Participation in the setup and further development of internal processes related to CAD and ERP systems, capacity planning, work instructions, and in the production.
- In the medium-term, you will take over managerial and/or project responsibility in the domain of electrical engineering.

You should have a rounded profile and ideally:

- You have completed basic education in a relevant profession and have completed further education at a technical school. Alternatively, you have a degree from a university and are hands-on oriented.
- You have experience in carrying out larger projects that include power electronics, ideally in the MW-scale and including plant construction. In addition, you can demonstrate that you have experience related to ATEX requirements.
- You are able and willing to work in a fast-paced and rapidly evolving environment and will apply your know-how in different fields as required by business priorities.
- Written and oral German and/or French skills are an advantage.

In case of interest, please send your application documents in electronic form to [hr@grz-technologies.com](mailto:hr@grz-technologies.com). We are looking forward to hearing from you.
