

GRZ Technologies Ltd. is a start-up company active in the field of energy technology. Backed by several industrial partners, we develop hydrogen storage and compression systems. Our site and the workplace are in Grolley (Switzerland) and is easily accessible by public transport.

We offer a pleasant working environment in a small, dynamic, innovative, and international team. We cultivate an entrepreneurial spirit and are oriented towards the development of our collaborators. This is how we achieve our ambitious goals as an organization.

Since the company is in a high-growth phase of its development, many opportunities for professional growth exist. To expand our team, we are looking for a

Software Engineer

Your primary activities in the company will be:

- The design and continuous improvement of software that controls our machines. This comprises software development in object-oriented style, software-hardware co-design, reviews and refactoring, and collaboration with mechanical and electrical engineers.
- Customer project related work including adaptation of existing code, the commissioning of systems, monitoring of plants, remote customer support, and guidance/supervision of technicians.
- Support of other business units such as the business IT, the project management team, and the general management of the company.

You should have a rounded profile and ideally:

- You have completed basic education in a relevant profession and have completed further education at a technical school. Alternatively, you have a degree from a university and are hands-on oriented.
- You have experience or very strong interest to develop code for control of hardware in object-oriented style on a large scale. Thereby, you strive for correctness, reliability, safety, and performance.
- You are able and willing to work in a fast-paced and rapidly evolving environment and will apply your know-how in different fields as required by business priorities.
- You have excellent English-language skills. Written and oral German and/or French skills are an advantage.
- If you are still not sure whether to apply, simply send us pointers to your previous work (e.g., open-source repos, blog posts, etc.) and we will get in touch.

We are looking forward to receiving your application documents in electronic form on

hr@grz-technologies.com.
