

**GRZ Technologies LTD** is a start-up company active in the field of energy technology. Backed by several industrial partners, we develop hydrogen storage and compression systems. Our site and the workplace are in Avenches (Switzerland) and easily accessible by public transport.

We offer a pleasant working environment in a dynamic, innovative, and international team. We cultivate an entrepreneurial spirit and are oriented towards the development of our collaborators to achieve our ambitious goals.

Since the company is in a phase of rapid growth, many opportunities for professional development exist. To expand our team, we are looking for a

## PLC Programmer

Your primary activities in the company will be:

- Conceptualization and planning of machine control systems
- Collaboration with other technical departments (process, electrical, mechanical design, etc.)
- Implementation of machine control, communication, and frontend
- Review of colleagues' work (four-eye principle, quality assurance)
- Commissioning of machines both in-house and at the customer's site
- Support in creating documentation
- Providing support services for customers

You should have a rounded profile and ideally:

- Completed studies (University, ETH, FH, HF) in electrical engineering, mechanical engineering, automation, computer science, or similar
- Experience in PLC programming with Codesys, Lasal, TwinCat
- Experience in object-oriented programming (Java, C#, etc.) is desirable
- Knowledge in programming process plants is desirable
- Goal-oriented and strong communication skills
- Instrumentation and control knowledge is advantageous
- Independent, structured, and reliable working style
- Experience with version control systems (Git) is desirable
- Language skills: English (written/spoken), German, and French are an advantage

In case of interest, please send your application documents in electronic form to [plc.prog@grz-technologies-sa.odoo.com](mailto:plc.prog@grz-technologies-sa.odoo.com). We are looking forward to hearing from you.
